

Record of Sale LLC

Audit-ready notification, outreach and records software for regulated workflows

CAPABILITY STATEMENT · SMALL BUSINESS · UEI PF2JVM8KU7Y1 · CAGE 26CY8

CORE COMPETENCIES

- **Next-of-kin and family notification workflows.** Our product nextofkinnotice.com helps California hospitals and skilled nursing facilities meet AB 2598 (Probate Code §7600.4; Health & Safety Code §1280.7): a documented reasonable attempt to notify known next of kin within 72 hours, then notice to the county public administrator within 2 business days.
- **Logged outreach on every channel.** A dedicated tracked phone number for each facility. Calls, texts, emails and letters are logged with carrier and provider delivery receipts.
- **AI voice intake.** Zuri, our AI voice agent, takes family callbacks and logs each one to the case record.
- **Generated notices and mail.** County public administrator notice PDFs, plus printing and mailing.
- **Tamper-evident recordkeeping.** An audit ledger anchored to the Bitcoin blockchain through OpenTimestamps, so records can be checked independently.
- **Training and certification** for the staff who run notification procedures.
- **Public-safety alert publishing.** Our product noticenearby.com turns official government alerts (NWS weather, USGS earthquakes, public health, recalls, official missing-person alerts) into papers, vertical video briefs with official maps, and X/YouTube posts for an audience of 277k followers, using official data only.
- **Transaction document packets.** Our product recordofsale.com sells bills of sale and checklists for private-party sales, with Stripe payments.

DIFFERENTIATORS

- **Built for deadlines set by law:** 72-hour and 2-business-day clocks, with timestamped proof of every attempt.
- **Evidence, not just activity logs:** carrier and provider receipts plus a ledger anchored by a third party.
- **HIPAA-oriented design:** portal hosted on AWS under a signed AWS Business Associate Agreement, Neon Postgres, and two-factor authentication.
- **Commercial software, already in production:** the same workflow pattern (contact attempts, receipts, callbacks, formal notice, audit trail) fits other casualty, bereavement and family-contact processes.
- **Lean and responsive:** one owner who is accountable for delivery from start to finish.

PAST PERFORMANCE

Commercial product deployed (nextofkinnotice.com; recordofsale.com; noticenearby.com). The company is early stage, with no federal contract past performance yet. We are open to subcontracting and teaming with established primes.
